

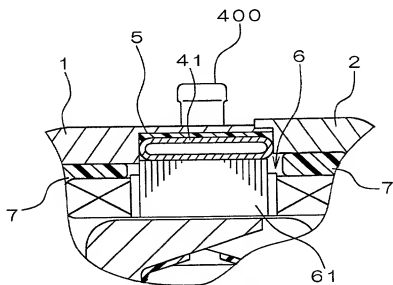

Figure 1 illustrates the stages of chick development from fertilization to hatching. The diagrams are arranged in a vertical column, numbered 1 through 12. Each diagram shows a cross-section of the developing embryo. Diagram 1 is a single cell. Diagram 2 is a two-cell stage. Diagram 3 is a four-cell stage. Diagram 4 is an eight-cell stage. Diagram 5 is a morula stage. Diagram 6 is a blastula stage. Diagram 7 is a gastrula stage. Diagram 8 shows a stage with a visible head. Diagram 9 shows a stage with a visible tail. Diagram 10 shows a stage with a visible beak. Diagram 11 shows a stage with a visible eye. Diagram 12 shows a hatched chick.
